PROFESSIONAL SUMMARY

I am a former Logistics Manager who found his calling in web development and design. I am currently transitioning to a Front End developer, specializing in React.js. While I lack direct professional experience in development, my learning speed has grown exponentially as I tackle practical challenges.

On my personal page, you will find projects showcasing the skills I have acquired in this specialization process. I highlight my ability to solve problems under pressure, communication skills, and experience in teamwork—skills perfected in my previous role.

EDUCATION

- Web Developer:Software Engineering
  - Platzi, Virtual Education

HISTORIAL DE EMPLEO

Jan. 2020 - Dec. 2023
Villa Mercedes, San Luis

Logistics Manager, Sanchez Agronegocios SA

- Train shipping department personnel on roles or responsibilities regarding global logistics strategies.
- Direct inbound or outbound logistics operations, such as transportation or storage activities, safety performance, or logistic quality management.

- Conduct or review environmental audits for logistics activities, such as storage, distribution, or transportation.
- Analyze the financial impact of proposed logistic changes, such as routes, shipping modes, volumes, or product mixes, or carriers.
- Collaborate with other departments to integrate logistics with business systems or processes, such as customer sales, order management, accounting, or shipping.
